**Toray Applies for Japanese Approval of Additional Indication of Pruritus
Treatment REMITCH® CAPSULES 2.5µg**

Toray Industries, Inc. (head office: Tokyo; President: Akihiro Nikkaku; hereinafter referred to as “Toray”) today announced that it filed for an additional indication of improving pruritus in peritoneal dialysis patients (use only when sufficient efficacy is not obtained with the existing therapies or treatments) (hereinafter referred to as the “new indication”) for REMITCH® CAPSULES 2.5 µg (generic name: nalfurafine hydrochloride; hereinafter referred to as the “Agent”) in Japan on September 28, 2016. Toray has already received the manufacturing and marketing approval for the Agent, which is promoted and distributed by Torii Pharmaceutical Co., Ltd. (head office: Tokyo; President: Shoichiro Takagi) as a pruritus treatment in the country. (Affiliation: Japan Tobacco Inc. [head office: Tokyo, President: Mitsuomi Koizumi])

The Agent is the highly selective kappa opioid receptor agonist invented by Toray and has been distributed in Japan as a treatment of pruritus for hemodialysis patients (approved in 2009) and chronic liver disease patients (approved in 2015) (use only when sufficient efficacy is not obtained with the existing therapies or treatments) (Promotional activities for pruritus in chronic liver disease patients are conducted by Sumitomo Dainippon Pharma Co., Ltd. [head office: Osaka; President: Masayo Tada]).

The three companies hope that gaining approval for the new indication will serve as a new option and significantly contribute to the treatment of pruritus in peritoneal dialysis patients.
