Tokyo, August 27, 2018

JT Signs a Letter of Intent to Initiate Discussion to Terminate Agreements on Exclusive Rights to Develop, Commercialize and Market of Six Anti-HIV Drugs in Japan

Japan Tobacco Inc. (JT) (TSE:2914) has announced today the conclusion of a non-binding letter of intent (LOI) for initiating a discussion with Gilead Sciences, Inc. (Gilead) to terminate the license agreements for six anti-HIV drugs (Current HIV Drugs). The Current HIV Drugs were developed by Gilead, and have been exclusively licensed to JT to develop and commercialize in Japan.

JT and Torii Pharmaceutical Co., Ltd (Torii) (TSE:4551) have also announced the conclusion of a non-binding LOI for initiating a discussion to terminate the license agreements by which JT grants Torii the exclusive rights to market the Current HIV Drugs in Japan.

1. Rationale of the LOI

JT and Gilead have signed exclusive license agreements for the development and commercialization in Japan of “Viread® Tablets 300mg” “Emtriva® Capsules 200mg” “Truvada® Combination Tablets” in 2003, “Stribild® Combination Tablets” in 2010 and “Genvoya® Combination Tablets” “Descovy® Combination Tablets LT/HT” in 2011.

JT and Torii signed exclusive license agreements, under which Torii has been marketing the Current HIV Drugs in Japan.

Gilead notified JT that Gilead has decided to manage the regulatory approval process and handle marketing in Japan of a novel anti-HIV drug Biktarvy®, developed by Gilead, through Gilead’s Japanese subsidiary. In addition, Gilead has also offered JT to terminate the exclusive licenses for the Current HIV Drugs. JT and Gilead have now agreed to initiate the discussion as above and JT and Torii have also agreed to initiate the discussion for the termination of the exclusive rights to market the Current HIV Drugs in Japan.

2. Overview of the LOI

JT will discuss in good faith with Gilead and Torii, respectively, the terms and conditions including compensation of the termination of the license agreements.

3. Overview of Gilead

(1) Name	Gilead Sciences, Inc.
