

CDP 2025, Q7.55.2 Unit error and correction

July 2026, JTI Corporate Sustainability

Purpose of this Document

This erratum outlines corrections identified in the CDP Climate Change Questionnaire 2025 following its publication. The purpose of this document is to ensure transparency and maintain the accuracy and reliability of disclosed information.

Summary of Corrections

Question 7.55.2 requests details about emissions reduction initiatives that were active within the reporting year. The JTI financial figures provided to JT for consolidation in 7.55.2 are incorrect, having been overstated by a factor of 1,000. This is visualized by highlighted rows in the below tables:

Incorrect Data published in CDP 2025 for Q7.55.2

Incorrect Figures for Q 7.55.2				
Initiative category & Initiative type	Annual monetary savings (JPY)	Investment required (JPY)	Payback period	Estimated lifetime of the initiative
Energy efficiency in production processes / Process optimization	4,543,200,000	58,304,400,000	11-15 years	11-15 years
Energy efficiency in production processes / Cooling technology	7,269,120,000	60,576,000,000	4-10 years	11-15 years
Energy efficiency in buildings / Building Energy Management Systems (BEMS)	7,572,000,000	9,086,400,000	1-3 years	Ongoing
Energy efficiency in production processes / Reuse of steam	14,235,360,000	128,724,000,000	4-10 years	11-15 years
Low-carbon energy consumption / Low-carbon electricity mix - Green Tariff	0	90,864,000,000	No payback	Ongoing
Energy efficiency in production processes / Compressed air	3,028,800,000	20,898,720,000	4-10 years	6-10 years
Low-carbon energy generation / Other, please specify - Combined heat and power (cogeneration)	0	121,152,000,000	No payback	Ongoing
Low-carbon energy generation / Solid biofuels	0	90,106,800,000	No payback	11-15 years

Low-carbon energy generation / Solar PV	12,115,200,000	45,432,000,000	1-3 years	16-20 years
Energy efficiency in production processes / Fuel Switch	14,853,686.47	168,950,000	11-15 years	11-15 years
Energy efficiency in production processes/ Waste heat recovery	7,944,444.444	22,000,000.00	1-3 years	11-15 years

Corrected information

Corrected Q 7.55.2				
Initiative category & Initiative type	Annual monetary savings (JPY)	Investment required (JPY)	Payback period	Estimated lifetime of the initiative
